

Storage

WE LOVE TO SIMPLIFY YOUR STRATEGY AND GIVE YOUR BUSINESS A BOOST

- We want to be **YOUR GPS** in the world of ICT infrastructure & trends.
- We love to draw the Big Picture for you and align ICT architectures with your business needs.
- We design & align your core ICT infrastructure layers for optimal data transport, storage, management, protection, and disaster recovery.
- We architect & construct an optimized ICT infrastructures for for your DATA.

LET'S TALK ABOUT YOUR BUSINESS

- How save is your data network & security?
- How available is your storage?
- How easy is your data manageable
- How flexible is your datacenter

Our team shapes around your business

- Data, after human capital probably the most important asset in your company.
- How much is it worth to you to keep your data available and protected ?
- What is the impact on your business in case of data unavailability or even data loss?
- Is it acceptable to lose access to your data for an hour?

Tell us your needs and we will shape a solution around your business.

Motivated people driven by IT with over 180 years of experience

We at Uptime ICT aid our customers with solving these kind of questions. Linking the needs of our customers and the core infrastructure layers of your environment is what we are good at and we like doing it. Additionally we can help with extra manpower, architectural design, calculating downtime cost, training, SAN monitoring, ... you name it.

**WE WOULD LIKE TO SIT DOWN WITH YOU AND BRING
SUCCESS WITHIN YOUR REACH.
WE PROMISE WE TALK ABOUT BUSINESS AND NOT
AROUND IT.**
